OT-F³ Surgical Tray

Intuitive handling by a new Surgical Tray design

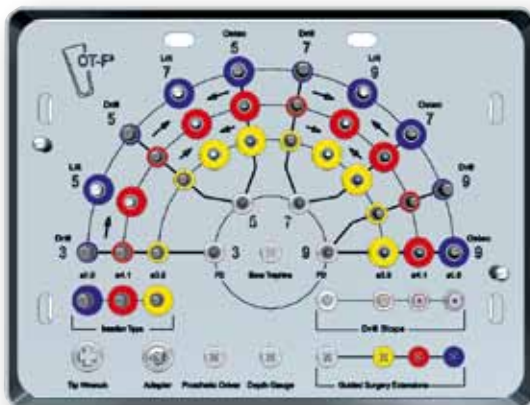

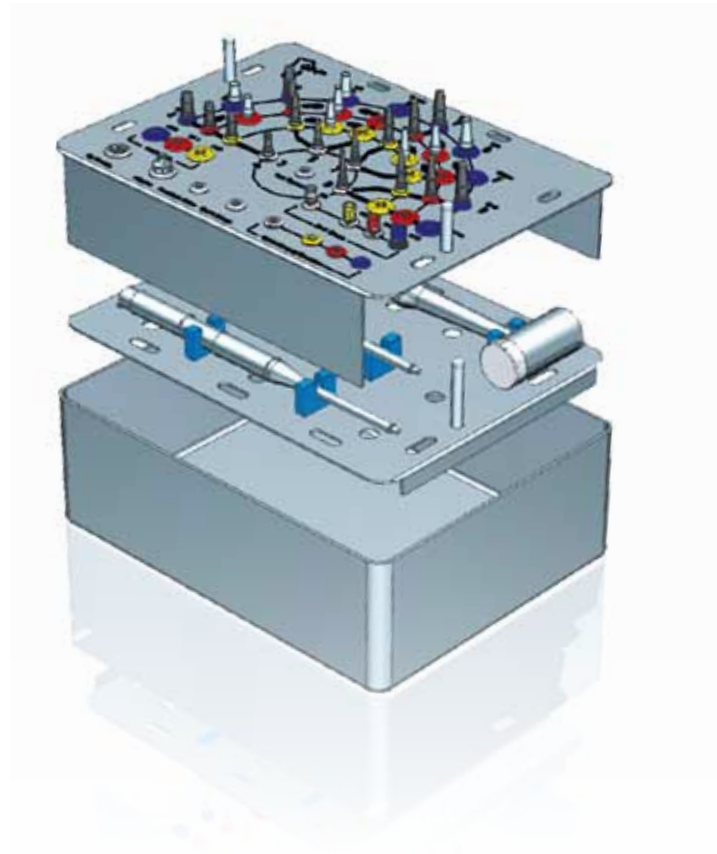

The creatively completely renewed OT-F³ surgical tray offers all components for an implant bed preparation with cutting drills, compressing osteotomes together with all auxiliary tools for insertion of the OT-F³ implants.

The apically concave, cutting osteotomes for the internal sinus lift may be added.

The self-explanatory graphics shows the surgical process and facilitates the correct positioning after use and cleaning. The logical positioning of instruments in the compact surgical tray allows intuitive handling and therefore offers easier workflow and a saving of time for user and team.

Features at a glance:

- OT-F³ drills of new generation
- Compressing osteotomes
- Optionally expandable with the supplementary „Sinus Lift“ set (cutting osteotomes, 3mm Sinus lift Drills) for internal sinus lift
- Possibility of expansion with the extension set „Guided Surgery Extensions“ (launch planned)
- Effective and self-explanatory surgical protocol, intuitive handling
- Simple positioning of components after use and cleaning

Description

Art. No.

OT-F³ Surgical Tray, complete

03-8009002110

Optional:
Add on „Sinuslift“

03-8009002510

Optional:
Add on „Guided Surgery Extensions“

(launch planned)
